Who Owns What?

Understanding Electric Equipment Responsibilities

Matt Hotzler Manager

As July rolls in with longer days and rising temperatures, it also brings the increased potential for severe weather. Summer storms can arrive quickly and cause significant damage to essential electrical equipment throughout our community.

H-D Electric Cooperative is always prepared to respond swiftly to outages and restore power safely, but it is also important for homeowners to understand which parts of the electric system are their responsibility and which are maintained by us at the co-op. Understanding these key differences can help speed up repairs and ensure everyone stays safe when the weather turns rough.

H-D Electric is responsible for maintaining and repairing the equipment and lines that run to your home, including utility poles, distribution power lines, electric meters, and pad-mounted transformers.

H-D Electric members are responsible for the equipment located between the electric meter and your home or business, including any underground service lines that lead into the

structures and the service panels. Members are also responsible for the weatherhead and service mast located outside the home.

If any equipment that you (the homeowner) are responsible for is damaged, please call a licensed electrician to conduct the repairs. H-D Electric also has licensed electricians for hire who can help with issues related to your equipment. A professional has the experience and know-how to assess and manage these types of repairs.

When severe weather damages electrical equipment, it's important to note that any necessary repairs to the homeowner's equipment must be conducted before H-D Electric crews can restore power to your home or business. By understanding the equipment you are responsible for, the repair and restoration process will be smoother and faster.

Trees and landscaping contribute to the natural beauty of our surroundings. However, regular trimming is essential to ensure reliable electric service and minimize damage from severe weather. H-D Electric regularly trims trees throughout our service territory to improve service reliability. If you spot a tree limb that is obstructing a distribution power line outside your home, please call H-D Electric so we can trim those limbs and maintain those lines.

Any overgrown limbs or vegetation around the member's owned service line is the homeowner's responsibility, and in these cases, please call a professional tree trimming service to assist.

By working together to understand the essential equipment that powers daily life, we can all be better prepared to start the repair and restoration process if severe weather impacts our community.

If you have any questions about your electrical equipment, we're here to help. If you encounter any H-D Electric electrical equipment that raises concerns while you're out and about this summer, please let us know so we can investigate and address any safety issues. Please contact H-D Electric at 605-874-2171 or email info@h-delectric.coop.

PAYMENT OPTIONS

H-D Electric Offers different payment options for your convenience to pay your bills at any time of day, night or on the weekend.

Pay by Phone using our automated phone system.

- Call H-D's phone number 605-874-2171 or 800-358-7233
- During office hours, we will transfer you to the automated system
- After hours, holidays and weekends, choose Option 2 to make a payment
- You need to have your account number available and your VISA, MasterCard or Bank Account information.

• SmartHub

- ◊ Sign up using your email address and account number
- View and pay your bills, view energy usage, manage notifications and contact methods
- Go to <u>www.h-delectric.coop</u> and click on 'SmartHub: Manager Account'

One-Time Payment Online—Pay Now

- ♦ Easily pay your bill with no registration required
- Use your billing account number and last name to access your account for payment.
- Go to <u>www.h-delectric.coop</u> and click on 'SmartHub: Pay Now!'

Recurring Bank Draft or Credit/Debit Card

Hassle-free way to pay your bill each month. Sign up and your payment is automatically deducted from your bank account or credit card on the 15th of each month.

• Drop Box

• We have a drop box located on the north end of the east parking lot at our Headquarters south of Clear Lake.

• Mail

 You can mail a check to our address: PO Box 1007, Clear Lake, SD 57226

Playground Safety

Source: National Safety Council

According to the Consumer Product Safety Commission, each year, more than 200,000 children go to U.S. hospital emergency departments with injuries associated with playground equipment.

As the weather warms up and trips to the park become frequent, take a moment to familiarize yourself with the risks on playgrounds and how you can prevent injuries.

Check for Playground Hazards

Nearly 80% of playground injuries are caused by falls. Watch out for these potential hazards when taking kids to the playground, and report any hazards observed.

Improper ground surfaces: Surfaces around playground equipment should have at least 12 inches of wood chips, mulch, sand or pea gravel, or mats made of safety-tested rubber or rubber-like materials. Playgrounds should be free of exposed concrete footings, rocks or tree stumps.

Overcrowded play areas: The area under and around play equipment should be a minimum of 6 feet in all directions while swing set areas should be twice the height of the suspending bar both in back and front of the swings. Structures more than 30 inches high should be at least 9 feet apart.

Unprotected elevated areas: Platforms higher than 30 inches should have guardrails or barriers.

Head entrapment spaces: Openings between rails, bars, rungs and even ropes of cargo nets should be less than 3 1/2 inches or more than 9 inches.

Sharp points and edges: Playground equipment should be free of protruding bolt ends, "S" hooks, and other sharp points and edges.

Visit the American Academy of Pediatrics webpage on playground safety to learn more.

Avoid Strangulation Hazards

The American Academy of Pediatrics cautions that children should not wear or play with anything that could get caught on equipment and become a strangulation hazard.

- Never attach or allow children to attach ropes, jump ropes, clotheslines or pet leashes to play equipment.
- Leave sweatshirts with drawstrings and necklaces at home.
- Remove bike helmets when playing on the playground.

Be Cautious of Too Much Sun Exposure

Playgrounds should have full or partial sun protection between 10 a.m. and 2 p.m., peak exposure time.

- Limit playtime at peak sun exposure time and know the signs of heat illnesses.
- Avoid burns; if playground equipment is hot to the touch, it is too hot for your child's bare skin.

Allow Only Age-Appropriate Activities

The Consumer Product Safety commission lists age-appropriate equipment in the Public Playground Safety Handbook. There is no substitute for parental supervision, especially for young children.

"Don't go outside during lightning storms!"

Marah Kinnunen, Age 8

Marah warns readers about the dangers of going outside during a lightning storm. Thank you for your picture, Marah! Marah's parents are Reuben and Sarine Kinnunen from Hayti, S.D.

Kids, send your drawing with an electrical safety tip to your local electric cooperative (address found on Page 3). If your poster is published, you'll receive a prize. All entries must include your name, age, mailing address and the names of your parents. Colored drawings are encouraged.

CHICKEN POT PIE

Ingredients:

- 1 pkg. prepared pie crust (top and bottom)
 1/3 cup butter or margarine
 1/3 cup chopped onion
 1/3 cup all-purpose flour
 1/2 tsp. salt
 1/4 tsp. pepper
 1 3/4 cup Progresso[™] chicken broth (from 32 oz. carton)
 1/2 cup milk
 2 1/2 cup chicken/turkey (shredded, cooked)
 2 cups frozen mixed
- vegetables (thawed)

Method

Heat oven to 425°F. Prepare pie crusts as directed on box for two-crust pie using nine inch glass pie pan. In two quart saucepan, melt butter over medium heat. Add onion; cook two minutes, stirring frequently, until tender. Stir in flour, salt and pepper until well blended.

Gradually stir in broth and milk, cooking and stirring until bubbly and thickened. Stir in chicken and mixed vegetables. Remove from heat. Spoon chicken mixture into crust-lined pan. Top with second crust; seal edge and flute. Cut slits in several places in top crust. Bake 30 to 40 minutes or until crust is golden brown. During last 15 to 20 minutes of baking, cover crust edge with strips of foil to prevent excessive browning. Let stand five minutes before serving.

Cindy Foster Codington-Clark Electric Member

Please send your favorite recipes to your local electric cooperative (address found on Page 3). Each recipe printed will be entered into a drawing for a prize in December 2025. All entries must include your name, mailing address, phone number and cooperative name.

CHICKEN MILANESE

Ingredients:

- 1 pkg. McCormick[®] Chicken Parmesan One Sheet Pan Seasoning Mix
- 1/4 cup grated Parmesan cheese
- 1 lb. thin-sliced boneless skinless chicken breasts 1 tbsp. oil

Method

Preheat oven to 400°F. Empty Seasoning Mix into shallow dish. Add Parmesan cheese. Brush chicken with oil. Coat evenly on both sides with Seasoning Mix. Discard any remaining Seasoning Mix.

Place chicken in single layer on foil-lined shallow baking pan sprayed with no stick cooking spray.

Bake 15 minutes or until cooked through, turn chicken halfway through cook time.

McCormick.com

SWEET AND SOUR CHICKEN

Ingredients:

3 boneless, skinless chicken breasts 2 tbsps. fat or oil 1/4 cup water 2 tbsps. cornstarch 1/2 tsp. salt 1/4 cup brown sugar 1/4 cup vinegar 20 oz. can pineapple chunks (drained, reserving juice) 3 tbsps. soy sauce 3/4 cup green pepper strips 1/4 cup onion (thinly sliced)

Method

Cube chicken into one inch squares; brown in fat. Add water. Cook in water until tender. In another pan combine cornstarch, salt, brown sugar, vinegar, pineapple juice and soy sauce.

Cook until slightly thick, stirring constantly. Pour sauce over hot chicken. Let stand at least 10 minutes. Add green pepper, onion, and pineapple chunks. Cook two to seven minutes until warmed through. Serve over hot rice. *Makes 4 servings.

Efficiency Tips for Older Homes

Miranda Boutelle Efficiency Services Group

Q: How do I improve the efficiency of my older home while keeping its charm?

A: I love old homes. The details and craftsmanship have always drawn me to them. The features of older homes can make them less efficient than modern construction, but it doesn't have to be that way. You can keep the charm and make your home more efficient.

Start by prioritizing the invisible upgrades that make your home more comfortable and efficient. When we were kids, I don't think any of us thought, "When I grow up, I want to spend my hard-earned money on insulation." It's not as exciting as new countertops or a remodeled bathroom, but air sealing and insulation can save you money every month. Then you can apply the savings to aesthetic improvements.

Many older homes are not properly insulated. Insulation has several benefits beyond sealing your home and keeping outdoor air from seeping in. It reduces outdoor noise, makes your home quieter and improves your overall comfort.

Always properly air seal before you insulate. Older homes with pocket doors, coved ceilings, dumbwaiters, doors to attic spaces and laundry chutes allow indoor air to escape through the cavities, gaps and cracks around these classic features. Sealing off open cavities around those features often requires plywood, rigid foam or drywall fastened into place and then caulked around the edges.

Keep an eye out for framing features that cause drafts. Balloon framing is a type of construction where wall studs run all the way from the foundation to the roof, allowing air to flow freely through those spaces. Second floors with knee wall attics on both sides are notorious for air leakage. Open cavities allow air to flow horizontally between the attic spaces, making the home uncomfortable and inefficient. Seal off the open cavities in the floor framing and insulate attic spaces.

Dense-packed cellulose or closed cell foam insulation can be sprayed into exterior walls. Skilled contractors can remove pieces of siding and drill holes to fill the wall cavities from the outside of the home. For brick or stone homes, holes can be drilled from the inside and then patched and painted. Insulating walls from the inside of the home requires more time and effort in preparation and cleanup, but having well-insulated walls is worth it.

Knob and tube wiring – commonly used form the early 1880s to the 1930s with no grounding wire – should be replaced prior to insulating walls and attics for safety purposes. Contact between insulation and knob and tube wiring can create a fire hazard.

People often think new windows are the best way to improve a home's efficiency. Considering the cost of replacing windows, I recommend investing in air sealing and insulation first. Then consider storm windows to keep the charm of the original windows, such as leaded glass and stained-glass windows in good condition. Choose from interior or exterior options that are operable and inoperable.

Once you've addressed the envelope of your home, consider appliance improvements. Replace your old electric water heater with a heat pump water heater. This upgrade can save a family of four an estimated \$550 per year and more than \$5,600 over the lifetime of the water heater, according to ENERGY STAR[®].

Invest in high-efficiency heating and cooling equipment. A mini-split heat pump, also known as a ductless heat pump, is a more efficient option than electric baseboard heating and provides the benefit of air conditioning.

Older homes don't have to be inefficient. Show your home some love and invest in energy efficient upgrades.

FIDDLE IN FIDDLE IN THE BAND Keeping Old-Time Music

UGOTTA

Alive One Jam at a Time

Frank Turner

frank.turner@sdrea.coop

"If you're gonna play in Texas, you gotta have a fiddle in the band," the classic Alabama song goes — and South Dakota is no exception. The Fiddlers of South Dakota, a group of traveling fiddle enthusiasts and musicians, carry that spirit, bringing the joys of acoustic music and an old-time charm to parades, festivals and hometown celebrations across the state through the summer months.

One of these traveling musicians, Ken Nelson of South Shore who joined the group in 2010, describes the group as a "loose-knit group of people who like to get together and jam." In total, the group has more than 30 members from eastern South Dakota and western Minnesota. And it's not just fiddlers – the ensemble includes other acoustic instruments, including mandolin, bass, banjo and harmonica.

According to Nelson, the group's repertoire draws from old-time traditions – breakdowns, waltzes, reels and jigs – the kind of music once played on porches, at barn dances and around campfires. "You could call it old-time music," Nelson said. "It's not really bluegrass or folk music. It's hard to describe it until you hear it."

Whether the song is an Irish jig or a Croatian polka, Nelson said the music never fails to connect with the audience.

Nelson said that connection is what drives these musicians to travel hundreds of miles to gigs across the state – from Fort Sisseton's Historic Festival to the Laura Ingalls Wilder Pageant in De Smet, to Prairie Village's Annual Steam Threshing Jamboree in Madison. It's not a living, he said, but more of a passion – a way to stay connected to music, to community, and to his fellow fiddlers.

"We play everywhere we can," he said. "And everybody enjoys it. We usually only make enough money to pay for the gas but that's all we really care about."

"Once We played for Potato Days over in Clark," Nelson laughed. "We were set up right next to the potato wrestling pit. We had to make sure we were sitting far enough back so that when mashed potato started flying, we didn't get splashed."

The Fiddlers of South Dakota expect to perform next at the Laura Ingalls Wilder Pageant in De Smet in July. Nelson said the public is not only welcome to attend the show, but acoustic string players of all ages are encouraged to join the organization's jam sessions and informal performances such as at Luce Cabin at Lake Herman State Park or after their performance in Fort Sisseton.

"We're always trying to incorporate new players into the group," he said. "Sometimes young students come and play with us, and they're always welcome. It's fun and humbling to have young players, sometimes as young as 10 or 11, join in, because, if you don't include the young people, it's not going to last."

STAR QUILTS

Honoring Cooperative Legacy With Time-honored Tradition

Frank Turner

frank.turner@sdrea.coop

Across the prairie, few gifts carry as much meaning as a star quilt. For many, these quilts are more than just blankets – they are acts of honor. Rooted in Native American culture, particularly among Lakota, Dakota and other tribes of South Dakota, star quilts have long been used to mark some of life's largest milestones, including graduations, marriages, memorials and moments of deep community respect.

Electric cooperative leaders Donovan Young Man, a former director of Lacreek Electric who was honored shortly before his passing earlier this year, and Melissa Maher, the former manager of Moreau-Grand Electric Cooperative, recently accepted star quilts from their cooperatives in recognition of their many years of service to their member-owners.

So what makes the star quilt such an honor? According to International Quilt Museum Collections Manager Jamie Swartz, the quilts are special because they take an incredible amount of skill and experience to assemble.

Many star quilts are block quilts, constructed from dozens or even hundreds of small fabric pieces carefully cut and stitched together. At the heart of the design is an eight-pointed star, a Moreau-Grand Electric Cooperative directors present retiring manager Melissa Maher (left) with a star quilt. *Photo by JJ Martin*

shape that demands near-perfect precision.

"There are so many small pieces that make up a star quilt," Swartz said. "When you are combining so many small pieces together to make a large, over-all design, there is more room for error. A small mismeasurement can create bumps, ripples or puckers in the patchwork."

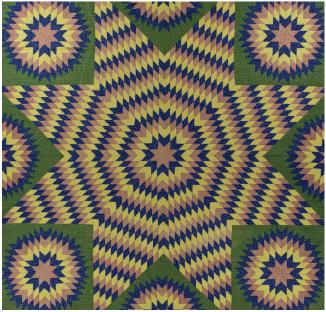

Photo Courtesy of the International Quilt Museum, University of Nebraska-Lincoln, 1997.007.0123

That level of precision, care and time-honored tradition a star quilt represents is a part of what makes it such a meaningful gift. In recent years, the practice of gifting star quilts has been embraced by some electric cooperatives as a way to express a deep appreciation for their employees who have dedicated a lifetime of work to their cooperatives and communities.

Remembering Donovan Young Man

Before his passing earlier this year, Donovan Young Man was honored by his cooperative at the Lacreek Electric annual meeting with a star quilt for his 31 years of service to Lacreek Electric, serving as a director for both his cooperative and the South Dakota Rural Electric Association. Specifically, the cooperative honored Donovan's commitment to both his cooperative and community.

Lacreek Electric CEO Josh Fanning said Young Man was known for both his calm and steady presence, and his exceptional ability to bridge tribal relations, fostering understanding and unity within the community.

In his community, Donovan was known for his profound impact on his community's youth. For 41 years, he devoted himself to the Oglala Lakota County School District, leaving a lasting legacy of dedication, education, and empowerment for the youth. Beyond education, Donovan served his community in many other ways, including as a member of the Oglala Sioux Tribal Council.

"Donovan had a lasting impact on our cooperative," Fanning said. "His wisdom, leadership, and steady guidance helped shape its direction and strengthen its foundation. His contributions will be remembered and felt for years to come."

"We chose a star quilt because gifting one is a deeply meaningful gesture in our area – an expression of profound respect, honor and the warmth of community," Fanning continued. "In many Indigenous cultures, the star quilt represents the highest form of recognition, symbolizing heartfelt gratitude for the recipient's enduring contributions. It also serves as a guiding light, reflecting the inspiration and direction they provide for future generations."

Honoring Melissa Maher

Moreau-Grand Electric honored Melissa Maher with a star quilt at the co-ops annual meeting in October for her 40 years of service at the cooperative. In addition to Maher, the cooperative also presented Larry Hieb with a quilt for his 55 combined years of service as both an employee and director.

Maher joined the cooperative in 1984 as manager's secretary. Through the years, Maher remained with the cooperative, serving as the member service director and later Moreau-Grand Electric's manager, the first woman to hold this title.

"I've always loved star quilts, what they stand for – the celebration and honoring of someone with an heirloom that they can enjoy for hopefully generations to come," she said.

Maher first experienced the star quilt tradition through her

Lacreek Electric employees gift director Donovan Young Man a star quilt to celebrate his 31 years of service to the electric cooperative. Photos by Mandy Scherer

mother, who taught kindergarten at Cheyenne-Eagle Butte School. As a teacher in the Eagle Butte community, her mother received star quilts from several of her students' families.

Seeing the joy it brought her mother, Maher continued the star quilt tradition into her years at the cooperative, gifting quilts to retirees of the cooperative, gifting dozens of star quilts made by quilt maker Bonnie LeBeaux to employees of the co-op, honoring retirements, directors, and even key members of the construction crew that helped build the new Moreau-Grand Electric office.

"It's hard to guess how many star quilts I have gifted over the years," Maher said. "Probably dozens if I had to guess."

The tradition came full circle at her retirement party when Moreau-Grand Electric presented Mellisa a star quilt of her own.

"We wanted to honor her 40 years of service and highlight abilities as a manager," said Paul Lawrence, a director of Moreau-Grand Electric. "It's a way of conveying that she led with honor and integrity, and she did exactly that."

Co-ops in the Classroom Exploring Energy

Co-ops in the Classroom is a program offered by H-D Electric and H-D Electric's wholesale power provider, East River Electric Power Cooperative.

In April, H-D Electric's Member Service Manager, Tom Lundberg and Jennifer Gross, Education and Outreach Coordinator for East River brought this energy education to 4th & 5th grade students in the Castlewood, Deuel, Hamlin, and Deubrook Schools in H-D Electric's territory. They reached out to around 215 kids.

A variety of hands-on demonstrations in this program are designed to help children learn the importance of respecting electricity, how to be safe around electricity and recognize where electricity comes from.

A question-and-answer session from the 4th & 5th grade students completed the program.

ENERGY EFFICIENCY TIP OF THE MONTH

During summer months, run large appliances that emit heat such as clothes dryers and dishwashers during the evening when the outdoor temperature is lower. Running heatemitting appliances in the evening will reduce indoor heat gain during the day when outdoor temperatures are highest and ultimately keep your air conditioner from working harder than necessary.

Source: energy.gov

\$402,048 in Taxes Supports Area Schools

H-D Electric, along with our power suppliers, Basin Electric Power Cooperative and East River Electric Power Cooperative, paid \$402,048 in gross kilowatt hour taxes for the Schools in Hamlin, Deuel, Brookings, Grant, Clark and Codington counties.

Breakdown of taxes	paid are as follows:
--------------------	----------------------

Hamlin County Schools	\$239,248
Deuel County Schools	\$ 144,950
Brookings County Schools	\$ 10,400
Codington County Schools	
Clark County Schools	\$ 361
Grant County Schools	\$109

These taxes are in addition to property and payroll taxes paid by your cooperative. Despite being a nonprofit organization, your cooperative has many tax obligations. However, it enables us to demonstrate one of our core values and have a positive impact in the communities we serve.

Climbing trees, swimming, flying kites, and playing outdoor games are great ways to spend warm summer days. Before you send your kids outside to play, make sure they are aware of electrical dangers.

Workforce Grows for the Summer

With summer construction projects in full swing, help us welcome Christian Vlaminck and Dawson Chappuis as 1,000-hour Lineworkers and Jaxon Peterreins as a summer helper they joined the Operations Department in May.

Christian calls his hometown Marshall, Minn. He graduated from Mitchell Technical College in Mitchell, S.D., with a degree in Powerline Construction and Maintenance. Some of his hobbies are hunting, fishing and in his spare time he likes to hang out with his friends. Christian also likes to give blood to help someone in need.

Dawson calls his hometown Marshall, Minn. He graduated from Mitchell Technical College in Mitchell, S.D., with a degree in Powerline Construction and Maintenance. Some of his hobbies are hunting, fishing, hanging out with friends and in his spare time he likes to watch movies/shows and make food.

Jaxon calls his hometown Gary, S.D. He graduated from Deuel School this spring and will be attending Mitchell Technical College in Mitchell, S.D., for Powerline Construction and Maintenance this fall. Some of his hobbies are hunting and fishing.

New Director

Please help us welcome Sherwin DeKam as the new director for District 2

Sherwin and his wife, Shelly, have lived on their acreage north of Castlewood since 1991. They have four children – three daughters and one son; and three granddaughters. He owns and operates his auto repair shop in Castlewood. In his spare time, he enjoys spending time with his family, boating and working outside on his acreage.

Sherwin is looking forward to being part of H-D Electric's board of directors because of his interest in affordable and sustainable energy for our rural communities.

Military Appreciation at Crystal Springs Rodeo June 28

79 years ago Clear Lake Rancher E.W. Wiesel had a dream. He wanted to turn a duck pond on his Crystal Springs Ranch into a rodeo arena. The sloping hills surrounding the pond would be perfect seating for spectators. The duck pond was drained of the water and the arena was built. The first performance was held the next vear in 1946 and there has been a performance every year since. The Crystal Springs Rodeo is part of the Badlands Rodeo Circuit, of which Touchstone Energy is a major sponsor. (Information taken from the Crystal Springs web site)

On **Saturday, June 28**, Touch Stone Energy Cooperatives: H-D Electric along with Codington-Clark Electric, Whetstone Valley Electric, Lyon-Lincoln Electric, East River Electric Power Cooperative will be sponsoring the Touchstone Energy Red, White and Blue Night/Military Appreciation Night.

- Employees and directors from local electric cooperatives will be greeting rodeo guests at the gates during Saturday's Red, White and Blue/Military Appreciation Night performance and will hand out special gifts to the children.
- We look forward to seeing you!

RESCUING ANIMALS

Co-op Members Foster and Support Pets In Need

Jacob Boyko

jacob.boyko@sdrea.coop

Tami Schanzenbach has always wanted to help animals.

From her earliest days in Aberdeen where she worked as a veterinary technician and helped start the Aberdeen Area Humane Society, to her later Pets N Stuff store in Mobridge, Tami's focus has always been on humans' furry companions and getting them into loving homes.

And even after a long career and a so-called retirement, she still finds ways to help. Through the Wamakaskan Onsica Humane Society, she opens her home to animals in need.

"I'm a foster failure," Tami laughed, admitting three of her own beloved pet dogs were originally supposed to be adopted out.

Served by Cam Wal Electric, Tami's home near Selby is the halfway point for countless animals on their journey from neglect, abuse and homelessness to their forever homes.

"If I have a person that calls me, if someone has found a dog, I ask initially if they're able to help me with taking care of that dog for a little bit until we can determine whether it belongs to somebody," she explained.

The pets will go to a foster home for the time being – Tami credits volunteers like her friend Annie Walker, a member of Moreau-Grand Electric from the McIntosh area, for stepping up and opening her home to foster animals.

"One day, Tami had a picture of a litter of

puppies that needed

to be bottle fed,"

Walker said about

her first fostering

experience.

it would be

"I figured

something myself

and my children

would be up to,

Annie Walker with rescue, Layla. Submitted Photo.

Submitted Photo. and ever since then, I keep taking some animals from time to time."

If the dog isn't claimed, the rehoming process begins, starting with veterinary care.

"We go through and we vaccinate and treat the animal and do what's needed to be able to make that puppy or dog available for adoption," Tami continued.

am Wal Electric member Tami Schanzenbach with her

dogs Mac, Cash and Blu. Submitted Photo.

Sadly, the circumstances in which she receives them usually aren't pleasant.

The pets come from around Selby, many from the Standing Rock and Cheyenne River reservations, where they're often found abandoned. Tami recalls coming upon shocking discoveries, like "bait dogs" used to train fighting dogs in the Bismarck area.

"People will steal puppies and kitties and train their pitbulls for fights, and they have a dog that's called a bait dog," she explained. "And that you see in our area as well ... days where [multiple] people are missing

their dogs. People are coming in and stealing them and using them as bait dogs."

That's what Tami suspects happened to Cash, a 7-yearold pitbull/lab cross found "in the middle of nowhere" covered in pellet shots and bite marks.

"It took a long

time for him to trust and know he's going to be okay here," Tami said. "And I don't

Cash, who was used as a "bait dog," was adopted by Tami. Submitted Photo

blame him, because he's never been taken care of.

Tami has made it her mission to end the cycle of animal neglect and abuse where she's able by sterilizing the pets coming into her care before they're adopted out. She also sponsors sterilizations for other peoples' pets.

"We just had about 12 dogs that we sponsored to be spayed at the local vet," she said. "We had a lady that helped me with a donation and wanted it geared toward people that couldn't afford to have their animals spayed and neutered ... We have so many people that always have two litters per year."

Stopping the cycle also means barriers to adoption - if someone isn't a good fit, there's a chance that animal will be surrendered back to the rescue and the process will start from the beginning.

Tami conducts interviews with potential pet owners with hopes of finding a perfect match.

She added that she sometimes steers people with busy and demanding schedules away from getting dogs. A cat - famously independent – is often a better fit, she said.

Tami also employs sustainable adoption practices she says make for better-behaved dogs - eight weeks is generally the earliest age when she'll allow adoptions to occur.

"We have puppy socialization that occurs" when the puppies are little, she explained. "They wrestle and play with their siblings, and they create a lot of socialization that way. And there's a lot of research that has proven that if you keep them with their siblings during that period of time, they make a heck of a lot better dog going forth, because they've been through that socialization."

Jen Uecker, Board President of the Pierre/Fort Pierre Area Humane Society, also known as Paws Animal Rescue, says without volunteers like Tami and Annie, shelters like hers would be overrun and rescuing animals from abandonment wouldn't be possible.

"We rely heavily on volunteers to help ease the burden of our limited staff and resources," Uecker said. "The foster volunteers open their home to these animals not really knowing a whole lot

about them, their demeanor, where they came from, or anything, and they open their homes to help them feel comfortable and confident until they're ready for their new forever family."

Tami encourages people to volunteer, support their local rescues, adopt if they're able and above all, love their pets.

"There are a lot of dogs and cats and it's just not their fault – they get the bad end of things," Walker said. "Tami is super dedicated ... She's always willing to step in and help these animals find a better life."

For Tami, it all comes down to giving that love back.

"They provide unconditional love to humans, and sometimes we forget that," she said. "We work all day... When you come home, you need to spend some time with your pets."

Tami says her most rewarding rescue was Fez, an 8-week-old shepherd/collie cross found with mange, a skin disease caused by mites. She said she refused to give on Fez, who is now a healthy dog with a full coat of hair. Submitted Photo.

REMEMBERING WHEN THE LIGHTS CAME ON

Central South Dakota Rancher Looks Back to Days Before Power

Jacob Boyko

jacob.boyko@sdrea.coop

Near Big Bend Dam in central South Dakota, farmer and rancher Clayton Knippling works the same land his father and grandfather had decades before.

The work he and his wife, Evelyn, and two sons do on the sprawling acre family ranch looks very different than it did back then, though. That's because today the ranch has electricity.

Back in the 1940s and early 1950s,

having electricity was a luxury enjoyed almost exclusively by people in towns and cities, or rural folks who happened to live along major highways. With their homestead several miles northeast of Fort Thompson, the Knipplings understood their odds of getting connected to a utility were slim for the time being. Their lives were powered by an old diesel generator out in the barn – enough to keep the kitchen refrigerator humming and a couple of light bulbs lit.

"I remember being told, 'Shut that

refrigerator door! You're wasting cold air!'" Knippling laughed, thinking back to that overworked generator.

But as soon as the electric cooperative crews visited the ranch, that generator was permanently retired and would never run again.

Knippling thought back to that day in the early 1950s when he was about six years old. He remembers watching the trench-diggers from Tri-County Electric – merged into Central Electric in 2000 – trench their way to each outbuilding. Hours later, he would see those buildings shining bright in the darkness for the first time ever.

Having electricity didn't change the work out in the fields. Knippling said a lot of the work is the same in 2025 as it was in 1955. But back at the homestead, Tri-County Electric brought the Knippling ranch into the

WHEN THE LIGHTS CAME ON

20th century.

"We even had a welder after that," Knippling recalled. "That took 220 volts, and I don't think our old generator was putting off that. We could then fix our own iron."

Electricity was a game-changer for the Knipplings' water needs. Seizing the opportunity, they dug a new, deeper well with an electric pump for better quality water and ran lines out to each building.

"[Before we had electricity] there was a stool and a nail where a tin cup sat, and there was a bucket of water and everybody that came through would drink out of that cup, so if somebody got a cold, we all got it," Knippling laughed.

"Electricity allowed us to put in a pressure tank and then run the water lines to every house so we weren't carrying a bucket anymore."

The ranch also transitioned to all-electric pivot irrigation and pumps along the Missouri River. Today, Knippling Land and Cattle irrigates 1,300 acres of farm land – an unimaginable figure before there was co-op power.

In the winter, the new electric block heaters for the diesel engines ensured there was always at least one tractor that would start up.

Life was just a little bit brighter, warmer and simpler with co-op power.

An advocate for rural life and progression, Clayton has also served the last 42 years on the board of directors for Midstate Communications, the local member-owned telecom cooperative, in an effort to equalize the disparities between urban and rural life.

"It changed the world back in the '50s when electricity came," Clayton said. "A lot of kids left the farm because it was too rural. If you came from a farm, you didn't want to come back. After electricity came, it became easier for younger people to stay on the farm."

Clayton Knippling farms and raises cattle southeast of Fort Thompson on the same ranchland where he grew up, just 15 miles from his childhood home where Tri-County Electric first hooked up their power in the early 1950s. *Photo by Jacob Boyko*
